SUMMARY

Adaptable 3D Artist and upcoming graduate specializing in the full asset creation pipeline from 2D concept to final production ready 3D model. Proficient in Blender, Substance Painter, and modern game engines, with the flexibility to work across stylized and realistic visual directions. Committed to clean topology, efficient workflows, and collaborating closely with development teams to achieve the desired project vision.

WORK EXPERIENCE

3D Game Artist, Gingersun Games **Nov 2023- June 2025**

- Collaborated within the full 3D asset production pipeline for the game project "Elimora," executing NPC character modeling, rigging, animation, and environmental asset creation (buildings and props).
- Expanded the studio's portfolio by delivering platform optimized characters and props tailored specifically to Roblox technical requirements.
- Engineered high-performance optimization workflows for all 3D assets, ensuring game-ready low-poly standards while maintaining high visual fidelity.

Freelancer, Fiver **Feb 2022 - July 2023**

- Developed custom 3D mascot designs based on individual client concepts, branding guidelines, and diverse creative briefs.
- Crafted, textured, and animated low-poly game assets under iterative feedback loops, ensuring strict adherence to client specifications.

Game Artist, Educa Studio **Jan 2021 - May 2021**

- Designed and modeled specialized 3D assets, including stylized Nusantara themed weaponry and diverse game characters.
- Optimized 3D character models and environmental props to ensure seamless integration and real-time performance inside the engine.

SKILLS & TOOLS

- **3D Software & Engines**: Blender, Substance Painter, Unreal Engine.
- **Core Competencies**: 3D Asset Production Pipeline, Environment Design, Stylized & Realistic Art Directions, 3D Scenery Composition, Low-Poly Optimization.
- **Technical Workflows**: Clean Topology & Retopology, Character & Prop Modeling, Rigging, Animation, PBR Texturing.
- **Soft Skills:** Interdisciplinary Team Collaboration, Client Communication, Creative Problem Solving, Adaptability.

EDUCATION

Politeknik Elektronika Negeri Surabaya **2022 - 2026**

Bachelor of Applied Science in Game Technology | GPA 3,7 | 2022 – 2026

- Relevant Coursework: 3D Asset Pipeline, Game Art & Animation, Real-time Rendering, and Environment Design
- Thesis: Development of Texturing Techniques Based on 3D Object Types with Stylized Style in Survival Adventure Games.

Vocational High School 1 Bondowoso **2019 - 2022**

Vocational High School Diploma in Multimedia | 2019 – 2022

- Core Competencies: Basic 3D modeling, graphic design, and digital asset creation fundamentals.

AWARDS & ACHIEVEMENTS

Finalist | National Student Scientific Week (PIMNAS 37) **2024**

- Project: Smart Coastal Zone (A Smart City-based integrated coastal development plan).
- Developed immersive 3D visualizations as the primary **3D Artist**, transforming complex urban planning and architectural concepts into high-fidelity digital environments to **showcase regional technological integration.**

2nd Place Winner | Vocational Student Skills Competition (LKS Wilker 2) – 3D Game Art **2022**

- Awarded second place at the regional level for designing and modeling a comprehensive **3D environment scenery** themed around traditional Indonesian rice fields (sawah).
- Demonstrated high-level technical capability in environment design, asset placement, and composition within competitive time constraints.
